| Cumulative Revenue Estimation | US\$66 MM |
| Estimated IRR | 20% |

Project Summary

This project is focused on developing agroforestry and carbon opportunities in Guyana through collaboration with local partners and stakeholders. The current stage of the project is centered around rehabilitating coconut and mixed agriculture estates.

The project is committed to Environmental, Social, and Governance (“ESG”) principles with a community engagement program. This consists of local engagement programs with schools, education, and sustainable agriculture practice.
